Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in

the application:

Listing of the Claims

1. (Currently amended) Method for modifying a play list in an audio and/or video apparatus, comprising the steps of :

- displaying in a first area of a screen a representation of at least part of available tracks,

- displaying in a second area of the screen at least part of the current play list,

- determining a track to be considered upon a first ~~user~~ action introduced by a user,

- indicating the track to be considered by a specific representation in the first area of the track to be considered,

- upon a second ~~user~~ action introduced by a user, removing, if existing, the last occurrence of the track to be considered in the play list displayed in the second area.

2. (Currently amended) Method according to claim 1, wherein the first ~~user~~ action and the second ~~user~~ action are actions introduced on a remote control sending signals to the apparatus.

3. (Original) Method according to claim 1, wherein said specific representation of the track to be considered is highlighting the representation in the first area of the track to be considered.

4. (Currently amended) Method for modifying a play list in an audio and/or video apparatus, comprising the steps of :

- generating video signals defining a screen with a first area displaying a representation of at least part of available tracks and a second area displaying at least part of the current play list,

2

     - determining a track to be considered upon receiving a first signal
introduced by a user from a user interface,

     - indicating the track to be considered by generating video signals defining a specific representation in the first area of the track to be considered,

     - upon receiving a second signal introduced by a user from the user interface, removing, if existing, the last occurrence of the track to be considered in the play list displayed in the second area.

     5. (Original) Method according to claim 4, wherein the user interface receives signals from a remote control.

     6. (Original) Method according to claim 4, wherein said specific representation of the track to be considered is highlighting the representation in the first area of the track to be considered.

     7. (Currently amended) Audio and/or video apparatus having a media reader to read a medium where the data are organized in tracks, and a memory able to store a play list, comprising:

     - video means generating video signals defining a screen with a first area displaying a representation of at least part of the tracks and a second area displaying at least part of the play list,

     - a user interface for receiving a first signal determining a track to be considered, wherein the video means are meant to indicate the track to be considered by generating video signals defining a specific representation in the first area of the track to be considered,

     - control means for removing, if existing, the last occurrence of the track to be considered in the play list upon receiving a second signal introduced by a user from by the user interface.

     8. (Original) Audio and/or video apparatus according to claim 7, wherein the user interface receives the first signal and the second signal from a remote control.

3

9. (Original) Audio and/or video apparatus according to claim 7, wherein said specific representation of the track to be considered is highlighting the representation in the first area of the track to be considered.

10. (Currently amended) Method for modifying a list of items selected by a user from a given set, comprising the steps of:

- displaying in a first area a representation of items of the given set,

- displaying in a second area a list representing at least part of the previously selected items,

- determining an item to be considered upon a first ~~user~~ action introduced by a user,

- indicating the item to be considered by a specific representation in the first area of the item to be considered,

- upon a second ~~user~~ action introduced by a user, removing, if existing, the last occurrence of the item to be considered in the list displayed in the second area.
